"Make Work Hours Tracking Easy and Efficient."

✅ Work Hours Tracking System

Monitor clock-in and clock-out times, work hours, leave, and overtime from a single platform to increase workforce productivity.

✅ Access Control System

Manage access to authorized areas with controlled entry, and generate detailed reports to easily monitor all area usage.

✅ Visitor Management System

Control which areas visitors can access when authorizing them, and generate comprehensive reports to track all visitors to your organization.

Employee Time & Attendance Systems

COMPATIBLE WITH REMOTE WORK MODELS

- 📱 Mobile App
- ▣ Scan QR Code

Work hours tracking overtime and leave management, access control, and much more!
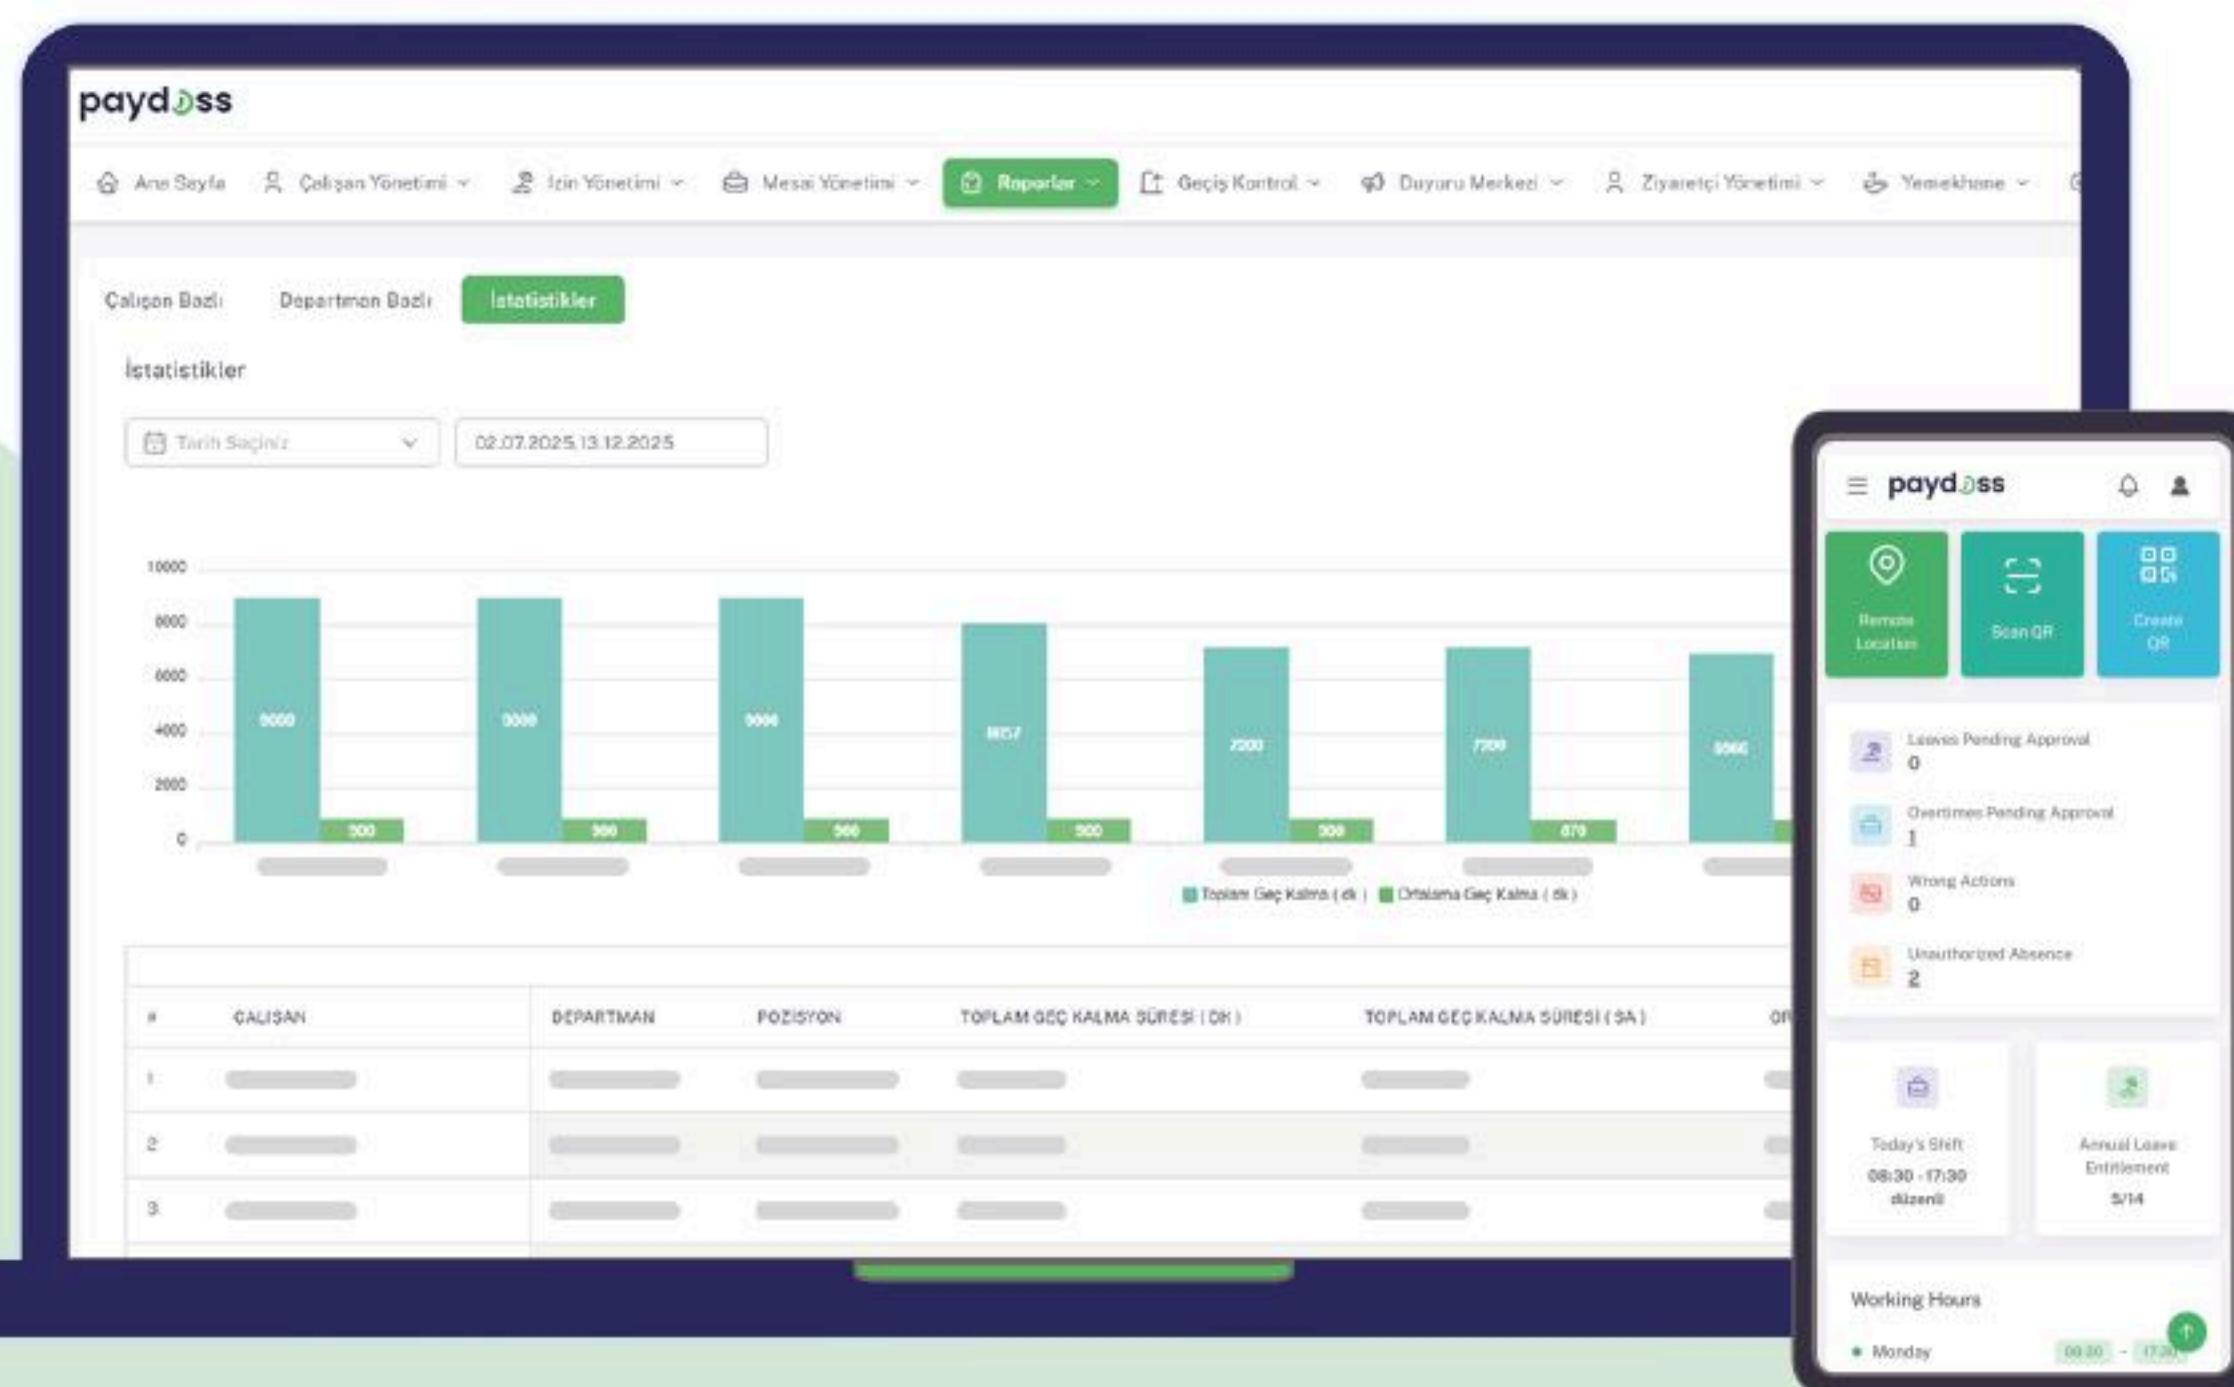

What is Paydoss?

Paydoss is a cloud-based and web-based platform that allows you to manage work hours tracking, leave management, visitor management, and access control. You can use it through the mobile app without any hardware or with our in-house manufactured devices.

With Paydoss's user-friendly interface and secure cloud infrastructure, you can digitize your personnel management processes and create a more efficient and flexible work environment.

> You can track employee work hours either by using a device with card authentication or **without any hardware** through the mobile app by scanning a QR code or using location verification.

Exclusive Features of Paydoss

- Work Hours Clock-in / Clock-out Tracking
- Personal Leave Management
- Overtime Management
- Visitor Management System
- Notifications and Announcements System
- Manager Mobile Application
- Customizable Interface
